400 - 1.800 l/h Cartridge filter

Typical applications

Plating, processes and laboratories

Features

- Magnetic drive pump
- Filter chamber with welded bottom (no seal)
- PP construction, non-metallic solution contact
- EPDM elastomers
- Cartridge tightened by knob, no by-pass
- Air release valve
- Drain valve
- Max. temperature 70°C
- Hose connection, in & outlet same diameter
- Single phase motor with thermal protection
- On/Off switch IP55 and cable included
