

10.000 - 30.000 l/h

Typical applications

- Ideal for clean or slightly contaminated acids and alkalines
- Suitable for most plating solutions
- Not suitable for electroless nickel and abrasive solutions or solutions which contain ferrous particles

Features

- Magnetic drive
- Sealless, therefore leakfree
- Provide extra safety factor for aggressive and expensive liquids
- Standard with GF union connections with a choice of sockets, available in PP, PVDF and CPVC
- Max. temp. PP 80°C / 176°F, PVDF 100°C / 212°F
- Motor with two component Polyurethane coating for excellent chemical resistance

Options

- Hose adapters
- Flanges
- Priming chamber
- Dry run protection
